

Company Profile

The Algenol
Vision is to
unlock the algae
economy

The Algenol Advantage

Algenol developed a highly productive and highly sustainable production platform that uses fundamental science and cutting edge technology to convert algae into high purity commercial products.

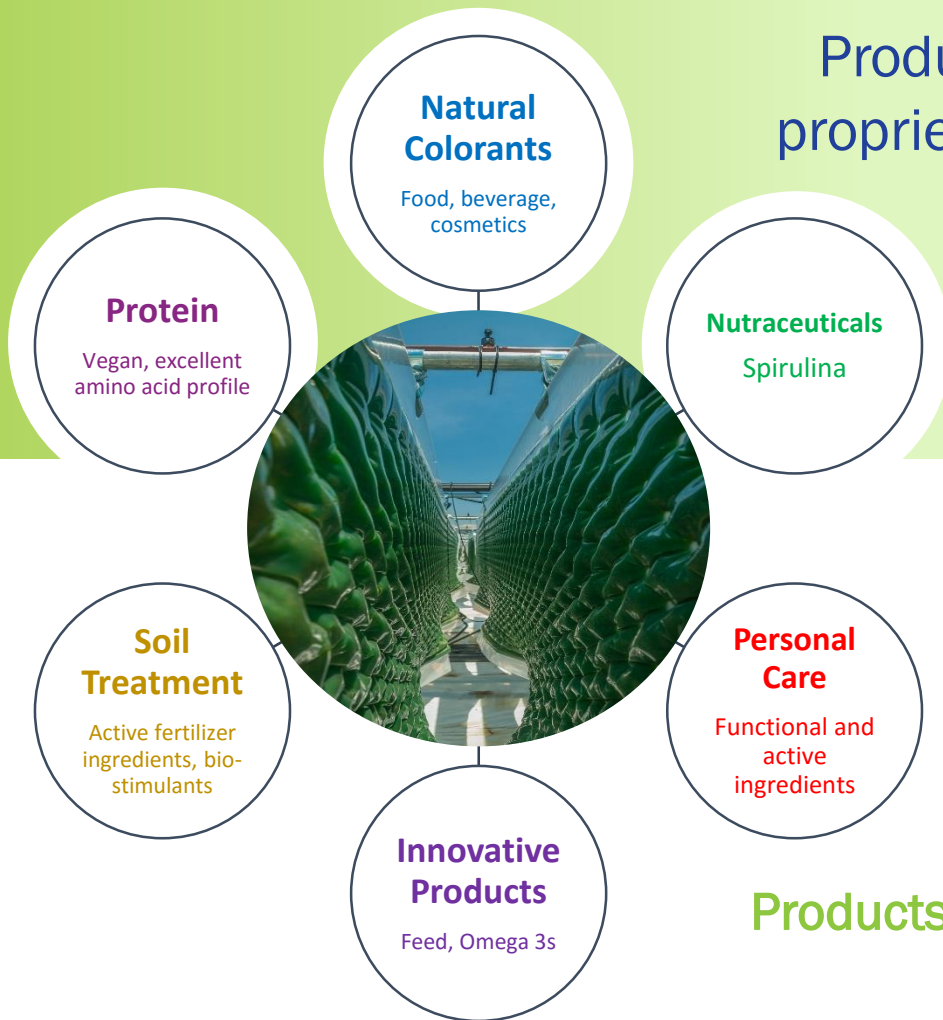

A Unique Technology for Today's World

Algenol has the capability to develop all natural products, as well as customized biology solutions to meet a variety of needs. We are your one stop shop for product development from lab to commercial production.

Algenol's strong IP and know-how positioned across numerous platforms, provides a distinct edge against competition in the field.

Products with Algenol's proprietary PBR technology

Products and Services

New Product R&D Services

- State-Of-The-Art Labs
- Advanced Analytics
- Dedicated Scale-up Rooms
- Highly skilled scientists

Scope:

- Natural/improved bulk algae
- Algae extracts for animal nutrition
- Colorants
- Food
- Nutraceuticals
- Personal Care
- Pharma
- Soil Treatment

Market Ready Applications

- Phycocyanin for food, nutraceuticals and cosmetics applications
- Spirulina for private label nutraceuticals supply
- Spirulina byproducts for bio fertilizers and animal nutrition

Commercial Manufacturing

- Ability to migrate products from lab to outside commercial modules
- Highly productive, self-contained production system
- Tightly controlled, lead to high purity products
- Open to tolling agreements
