

Innovate with Algenol

Why Algenol

Experience with natural algae platforms

Technology highly suitable to major types of algae with high personal care potential

Extremely clean, natural production platform with high purity and traceability

Proven ability to produce spirulina, phycocyanin and other spirulina extracts

Algae natural applications

Skin Care

Sun Protection

Antioxidants

Moisturizers / Emollients

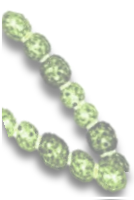

Hair Care

Nutrients

Amino Acids

Vitamins

Natural Care Colorants

ALGENOL

Innovate with Algenol

We can do it for you

Collaboration on developing bulk extracts or co-developing new functional ingredients that meet your personal care product needs

Access to large library of algae strains for multiple applications

Ability to quickly screen strain suitability and validate product economics

One location to move from lab to outdoor demonstration

How we work with you

Understand your needs and jointly design a product development program

Define the product and specifications

Test selected strains and validation methods

Recommend product development strategies

Validate the production economics and estimated product price

Finalize a commercialization approach
